Inference

- It is to be noted that WeRateDogs tend to give high ratings to Hairy dogs compared to dogs having less hairs.
- Twitter's favorite breed tends to be more diverse they tend to like both dogs with hairs and dogs without hairs as well.
- There is a difference between the dogs which people like and dogs with people retweet. People generally tend to retweet cuter dogs, rather than the bigger ones.
- Most of the popular dogs are labradors and it's related breeds. That's why it's the most popular choice of prediction algorithms as well.
- We can see with time WeRateDogs has become a lot popular but retweets are steady. It can probably focus more on the

breeds which are retweeted more to increase its number of retweets
